

PLASTIC TIE CUTTER 1000V

EGA Master insulated tools comply with IEC 60900 international standard, each one of the pieces being tested at 10,000V (10 times the voltage we certify). They are also tested rigorously according to what the norms establishes: adherence test, impact test, flame propagation test and dielectric penetration test.

 **1.000V**
 IEC 60900

MAIN APPLICATION FIELDS

Electrical installation	High Voltage networks	Electric maintenance
Power Plants	Low Voltage networks	Fire-fighters
Electric Stations and substations	Telecommunications	Lighting installation and repair

CAUTION

- 1** Don't ever use tools under voltage if they present pores, fissures, encrusted elements or if the white insulation layer is visible.
- 2** **Insulating floors and safety shoes** are recommended to work under voltage.
- 3** **Avoid contact with water** while working under voltage.
- 4** **Do not ever touch directly any item that may be under voltage.** Use a voltage tester to check first.

PLASTIC TIE CUTTER 1000V

Ega Master manufactures a wide range of electrician tools, among them the new plastic tie cutter, an easy to use and solid tool.

Tested for total safety!

1. The special design of the blades allows cutting the very tightly held cable-ties without damaging the cables.

2. Compulsory in the **automotive, aviation, white line, electricity and network industries** where the use of scissors or knives can involuntarily damage the cables and incur serious safety problems and resolution costs.

3. It allows cutting cables of up to 10 mm in diameter.

Scissors and knives damage the cables.

With Ega Master's new plastic tie cutter you can cut the cable-ties safely.
