

# 1000V INSULATED TORQUE WRENCH

EGA Master insulated tools comply with IEC 60900 international standard, each one of the pieces being tested at 10,000V (10 times the voltage we certify). They are also tested rigorously according to what the norms establishes: adherence test, impact test, flame propagation test and dielectric penetration test.

 **1.000V**  
**IEC 60900**

## MAIN APPLICATION FIELDS

<b>Electrical installation</b>	High Voltage networks	Fire-fighters	Automotive
<b>Power Plants</b>	Low Voltage networks	Lighting installation and repair	Railway industry
<b>Electric Stations and substations</b>	Telecommunications	Aeronautical	Electrical component maintenance

## CAUTION

- 1 Don't ever use tools under voltage if they present pores, fissures, encrusted elements or if the white insulation layer is visible.
- 2 **Insulating floors and safety shoes** are recommended to work under voltage.
- 3 **Avoid contact with water** while working under voltage.
- 4 **Do not ever touch directly any item that may be under voltage.** Use a voltage tester to check first.

# 1000V INSULATED TORQUE WRENCH

EGA Master 1000V torque Wrenches are the perfect tools for controlled tightening thanks to their precision, endurance and variety. They are particularly suitable for high voltage work and electrical assembly applications.

Individual box.

Anti-slippery handle.

Both right and left tightening is possible.
