

AUTOMATIC WIRE STRIPPERS

The EGA Master automatic wire strippers are designed for easy and safe cutting and stripping of insulated cables.

For television wiring, radio, household appliances, electrical works, automotive circuits, tele-phones, etc.

**STAINLESS
STEEL
blade**

1. For the cutting and stripping of insulated cables from 0.5 to 3.2mm diameter and from 0.2 to 8.5mm² section in a single step. Just squeezing the handles for opening and closing the jaws will easily remove the isolation from the cable.

2. 3 different models available for cable stripping of different diameters mm/ AWG.

3. Adjustable stop for adjusting stripping length during operation.
