MASTERGRIP
PIPE WRENCH

EGA Master manufactures a wide range of pipe tools, among which we must highlight the MASTERGRIP wrench. These wrenches are characterized by the quick and easy use. They have been designed and manufactured for the most demanding professionals and heavy works.

Award for the Best Tool "Spanish Inventors Club"

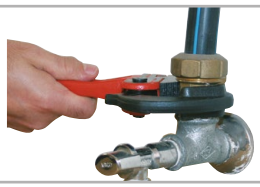
Medal, International Inventors Competition, Paris 2007

Best Product Award Iberferr Magazine, 2007

Provides a RATCHET FUNCTION that makes threaded pipe fitting really efficient.

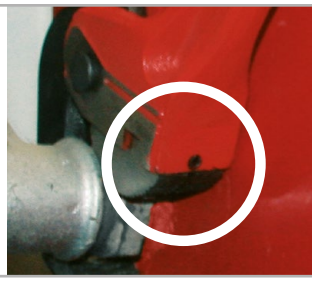
WORLDWIDE PATENT

1. ERGONOMICS, SAFE AND EASY USE: These wrenches **are designed to be operated with one hand and to ensure easy gripping** of the pipe.



2. BIG CAPACITY: With a single wrench **can grip different pipe and nut capacities.** The exclusive geometric design of the heel jaw and movable jaw, with special teeth, **allows a great grip on all type of surfaces.**

3. FIXATION SYSTEM: EGA Master uses a heel jaw and **spigot fixation system** which is positioned in a horizontal groove of the handle, so **this spigot supports all work forces** releasing the pin being free of them with the unique function of fixation.



4. THE CAST HANDLE: Guarantees comfort and prevents the wrench from slipping.
