

NUT WRENCHES

EGA Master nut wrenches range is made up by: The spud pipe wrench, the hexagonal pipe wrench and the hexagonal offset pipe wrench.

1. They are specially designed to fix the sinks and baths wastepipes nuts.

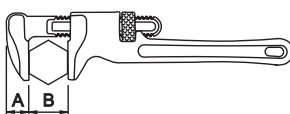

2. The handle is manufactured with ductile cast iron which lends it a great resistance.

3. The hook jaw's design of the hexagonal pipe and hexagonal offset pipe wrenches allows a secure grip by three faces of the nut.

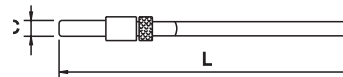

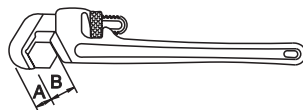

4. Large flange prevents nut from being inadvertently rotated when wrench is set down.
