

ANALOGIC PRESET TORQUE WRENCH

EGA Master's analog torque wrenches are ideal for using in production and assembly lines where the same torque needs to be applied repeatedly. Made of high alloy steel providing maximum strength.

From
1/4" to 1"

*G12

1. The ratchet gear is made in Cr-V for maximum strength.
2. Preset torque within its range of torque to the value that the user needs between 2.5 and 1000 N.m.
3. Reversible ratchet head with 45 teeth.
4. Oversized ergonomic & anti-slippery handles.
5. Individual carrying case.
6. According to the GGG-W-00686D and ISO-6789 standards.

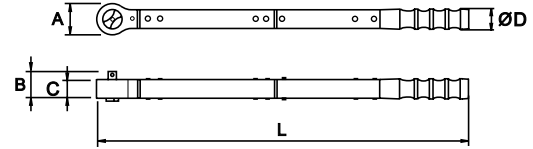

*G12: 12 months of warranty / All measuring instruments must be re-calibrated after one year of being used or after 10,000 cycles.
